## **TECWAR® Military Portable Reverse Osmosis 60 Heavy Duty Extreme (MPRO® 60HDX™) Water Purification System**

The TECWAR® Military Portable Reverse Osmosis 60 Heavy Duty Extreme (MPRO® 60HDX™) is a portable, modular and scalable water purification system that provides immediate, safe, potable water to small military units, first responders, and medical personnel for drinking, hygiene and food service. Because of its ease of operation and maintenance-friendly design, the TECWAR® MPRO® is ideal for military, humanitarian and disaster relief efforts as an initial operation capability.

The MPRO® 60HDX™ provides expeditionary forces at the small unit level an RO-based water purification system that produces potable water from freshwater, brackishwater or saltwater. The system can produce up to 60 gallons per hour (GPH) of purified water from a freshwater source and up to 30 GPH of purified water from brackish or seawater sources.

The MPRO® 60HDX™ is a safe alternative to bottled water. From a freshwater source, it can produce the equivalent of 1,816 , 16.9oz bottles of water in a 4 hour period or fill 304, 3-liter water bladders in a 4 hour period.

The MPRO® 60HDX™ reduces the logistical footprint before, during and after water operations. From a freshwater source, it can produce the equivalent of 7,270 , 16.9oz bottles of water in a 16 hour period (4 charge cycles) or fill 1,216 , 3-liter water bladders in the same time period.

The TECWAR® MPRO® 60HDX™ is designed to fit in an all-terrain vehicle (ATV) or any military/civilian vehicle.

The modules in cases with wheels can be rolled into place by one person. Modules can be lifted by 2 personnel.

### Transport and Storage

The modules are contained in separate 37" x 27" x 18.5" cases, each case weighs 46 lbs when empty

### The Purification Module

- Weight: 138 lbs
- Dimensions: 32" x 22" x 13"
- Can operate on 120 VAC or from a 24 to 28 VDC power source, the same used on U.S. military vehicles via NATO slave connector

### The Power Module

- Weight: 129 lbs
- Dimensions: 32" x 22" x 13"
- Runtime: 10 hours
- Recharge time: < 2hrs
- Two lightweight 24 volt Lithium Ion batteries for independent operation
- Supplies power to the Purification Module
- AC/DC power source charges the batteries while supplying power to the Purification Module
- Battery life: 3000 cycles (charges)

# ***Purify water anywhere in the world from any source.***
